

Small Unit Shower ***(SUS)***

Overview:

The **Small Unit Shower (SUS)** provides a new shower capability to the field. It is compact and lightweight, allowing it to be easily transported to forward area troops for remote shower operations. The SUS is a Non-Developmental Item (NDI) program funded by the Soldier Enhancement Program (SEP).

Description:

The SUS consists of a water heating/pumping unit, an air beam supported shower shelter with four shower stalls, all required hoses, and water conserving push button on/off shower heads.

The water heater operates on diesel/JP8 fuel and 24 Volt DC vehicle power and weighs 75 pounds. The shower shelter assembly is packaged in two canvas bags weighing 75 pounds each.

Set up by two soldiers takes 15 minutes and hot showers can be provided to 16 soldiers in 50 minutes.

The SUS is available on GSA Contract and can be ordered directly from the manufacturer at (513) 777-7763 by referencing GSA Contract Number GS-07F-9615G.
